

Guardian 2000 Security Mesh Fence System

THE ORIGINAL MODULAR SECURITY FENCE

The Guardian Fence System® is the first system to provide a total security solution, from easy installation to complete integration. The innovative modular design, constructed with high-strength security mesh, makes this system ideal for medium security projects.

Recommended for:

- Commercial Buildings
- Retail Facilities
- Partitioning
- Office Buildings
- Sports Facilities
- Industrial Facilities
- Government Buildings

BENEFITS

Anti-Cut & Anti-Climb

The Guardian Fence System® protects against both cutting and climbing, with heavy gauge mesh and small mesh openings that resist common cutting tools and hand or foot holds.

Modular Design

The modular design of the Guardian system allows for easy and affordable installation, upgrade, repair and maintenance.

Long Service Life

High quality galvanized steel and aluminum components provide for a long service life. The Guardian system is also available with a super-durable, Architectural Grade Powder Coating.

U.S. Patent No. 7,628,386. Additional U.S. and International Patents Pending.

Standard Options	
Height	8'
Security Mesh	SentryGuard 3-4-9 or DutyGuard 3-5-8 MiniLouver 75
Guardian Union	GU A-CP
Rails	
Galvanized Finish	2" Round
Powder-Coated	2" TS
Posts	
Galvanized Finish	Round - Sizing per engineer req.
Powder-Coated	Square - Sizing per engineer req.

The Original Complete Security Mesh System

Panels

High strength security mesh panels create an effective anti-cut, anti-climb barrier. The Guardian 2000 model is offered standard with DutyGuard 3-5-8 or SentryGuard 34-9 mesh, and a wide range of additional mesh options are available.

Guardian Unions

Extruded aluminum Guardian Unions, with panels brackets, secure the security mesh panels to horizontal rails within the Guardian Fence System®. The Betafence Guardian Union features a cover plate, keeping installation fixtures from view.

Posts and Rails

Panels are affixed to steels rails, which are attached to the steel posts. This modular configuration allows for fast installation – and that means that exact post spacings are not a requirement!

Gates

Choose from a wide range of gate styles, including pedestrian and drive Swing gates, as well as Slide and Cantilever gates.

Coating

Guardian system panels and gates are standard with a superior galvanization, and are available with Betafence USA's exclusive Super-Durable powder coating. This coating provides longer protection from U.V. rays and salt spray than either E-Coat or standard polyester coatings.

Warranty

The Guardian Fence System® is backed by a 10-Year Manufacturer's Warranty, giving you the peace of mind that the world's leading producer of fencing stands behind this product.
