

The Superior Retail Security Solution

The Fast-Installing Box Store Fence System

The EZ-UP Fence System by Payne has proven to be the superior solution for attractive commercial property ornamental fencing. Installing quickly and easily, this system is both efficient and cost-effective.

Recommended for:

- Retail Garden Centers
- Automotive Centers
- Bale & Pallet Storage Areas
- Staging Areas / Bull Pens
- Compressor Houses
- Commercial Perimeters
- Equipment Areas

BENEFITS

Fast Installation

Because of its unique rail support, an ornamental fence can be installed in as little as half the time required of conventional systems that are set between posts.

Easy Installation

Ground assembly and full section installation make this the simplest solution for Garden Center applications, also easily adapting to changes in post settings, terminal points and slight grades.

Ideal For Retrofit Projects

The EZ-UP system makes retrofitting existing fencing easy – and affordable – with the ability to use existing chain link framework to support the ornamental panels. This system is perfectly suited for projects with irregular or inexact post settings.

Long Service Life

High-quality galvanized tubular steel is coated with our exclusive Architectural Grade Powder Coating, providing the industry's longest-lasting protection.

The Efficient, Attractive and Cost Effective Ornamental Fence System

Panels

Panel heights can be constructed as high as 26 feet, and are available with unique Scalloped and Arched-Top designs.

Posts and Rails

Panels are connected with swages rails, allowing for a finished appearance that is seamless for fence lines of any length. This configuration allows for fast installation – and means that exact post spacings are not a requirement!

Gates

Choose from a wide range of gate styles, including pedestrian and drive Swing gates, as well as Slide and Cantilever gates.

Betafence USA's patent-pending gate jamb system installs faster and easier than any other gate available. Side panels are pre-fabricated with a jamb, and transom panels are fabricated to the exact size required.

Security Mesh

Security/Screening Mesh or chain link fabric can be easily integrated with the EZ-UP system, providing greater security against “pass-through” of inventory and visual screening.

Coating

EZ-UP system panels and gates are manufactured with galvanized tubular steel, then protected by Betafence USA's exclusive Super-Durable powder coating. This coating provides longer protection from U.V. rays and salt spray than either E-Coat or standard polyester coatings.

Warranty

The EZ-UP Fence System is backed by a 10-Year Manufacturer's Warranty, giving you the peace of mind that the world's leading producer of fencing stands behind this product.

EZ-UP Fence System by Payne Specifications

Standard Configuration			
Pickets	O/C Spacing	Rails	Posts
1" TS x 16 ga	5"	2" TS x 16 ga.	4" TS x 11 ga.

Note: Specifications subject to change based on specific project requirements.
