

Tempofor

Temporary Fencing

Welded Wire Temporary Fence Panels

Tempofor panels protect against theft, vandalism and accidents. This temporary fence solution keeps children and unauthorized people out of dangerous sites and enables access control of visitors to sites and events.

Recommended for:

- Construction Sites
- Events
- Traffic Control
- Road/Street Work
- Industrial Sites

BENEFITS

Fast & Easy Installation

The panels are manufactured using pre-galvanized materials for long-lasting corrosion protection in all weather conditions. The steel frame tubing is fully welded, and each wire is individually welded to the frame.

Easy Installation

Tempofor panels are easily transported, installed and moved within a site, and can be secured using a variety of base options and connection systems.

Attractive Fencing

The welded wire mesh of Tempofor panels provides a cleaner, more attractive appearance than traditional chain link solutions. Additionally, corporate, sponsor or contractor signage can be easily affixed to these temporary fence panels.

Tempofor

Temporary Fencing From The World Leader in Fence Manufacturing

Panels

Welded mesh (3.9" x 11.8"), from galvanized wire, electrically welded at every intersection and then welded to a steel frame. The panel, featuring rounded top corners, weighs less than 41 pounds, and is 11.3 feet wide by 6.5 feet tall.

Coating

The welded wire mesh and steel frame of Tempofor panels is fully galvanized for a long service life.

Gates

Betafence USA is the industry leader in standard gate configurations, and has the manufacturing capabilities and experience to produce custom solutions should a facility have specific gate requirements.

Tempofor Technical Data

Height	Width	Mesh Opening	Panel Weight
6.5 ft	11.3 ft	3.9" x 11.8"	40.8 lbs.
