

The New Standard In Ornamental Fencing

STRENGTH AND BEAUTY

Now you have a better choice: **UpGrade by Payne**, from Betafence USA, the global leader in fence manufacturing. Choose the affordable rackable fence, with a revolutionary, patent-pending design.

Recommended for:

- Office Buildings
- Schools
- Apartments and Condos
- Parks
- Single-Family Residences
- Sports Facilities
- Industrial Facilities
- Government Buildings

BENEFITS

Rigidity

The innovative design of UpGrade provides unrivaled stability, with formed pickets inside the industry's strongest rails. This means no breakable welded tabs, and fencing made to stand the test of time.

A Complete Range

UpGrade by Payne is available for all project types: Residential, Commercial and Industrial, with four different picket styles to meet any project requirement.

Superior Coating

Betafence USA's exclusive Architectural Grade Powder Coating protects UpGrade panels and gates from weather and U.V. aging, ensuring they will retain their beauty and structural integrity for many years, with a minimum of upkeep or maintenance.

Adapts To Slopes

UpGrade by Payne panels rack up to 48" per eight-foot panel – in both directions – providing an ornamental solution that performs in the widest range of environments.

The American-Made Ornamental Fence – Made Strong, Made To Last

Panels

UpGrade by Payne panels are manufactured using the industry’s highest-strength rails. Pickets feature “true” sizing, and feature full galvanization, without unprotected seams. The picket shape within the high-strength rails prevent rattle or removal, and allow for racking of 48” per 8-foot panel – equal to or greater than any comparable fence product!

Posts

Panels are attached with high-strength steel brackets to galvanized and powder-coated square tubular steel posts.

Gates

Choose from the widest available range of gate offerings, including opening configurations: Swing, Slide or Cantilever.

Coating

UpGrade by Payne panels and gates feature a unique Architectural Grade Powder Coat. This coating, used exclusively by Betafence USA, is super-durable and environmentally sound. This powder coating provides three times the U.V. protection and 50% greater salt spray resistance than other standard coatings – including E-Coat.

Colors

UpGrade by Payne is available standard with black coating. Additional colors, including custom matches, are available.

Warranty

UpGrade by Payne is backed by a 20-Year Manufacturer’s Warranty, giving you the peace of mind that the world’s leading producer of fencing stands behind this product.
